Porcelain Mosaic

The Material

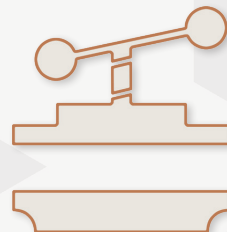

Full-body porcelain mosaic is created by pressing colored powders, giving the finished material a uniform color throughout the entire body, not just on the surface, as occurs with glazed tiles. A technical material par excellence for floor and wall coverings, thanks to its versatility, porcelain mosaic lends itself to a wide range of solutions and uses: resistant to atmospheric agents, cyclical temperature changes, scratches and impacts, easy to maintain and clean, suitable for indoor and outdoor spaces, public or private, all of which make it a valid solution for any of your projects.

Il gres porcellanato “in massa” viene ottenuto tramite la pressione di polveri colorate, donando al materiale finito una cromia uniforme per tutta la sezione del corpo, non solo in superficie, come avviene con gli smaltati. Materiale tecnico per eccellenza nell’ambito del rivestimento pavimentale e parietale grazie alla sua versatilità, il gres porcellanato si presta ad una vasta gamma di soluzioni ed impieghi: resistente agli agenti atmosferici, ai ciclici cambiamenti di temperatura, ai graffi e agli urti, pratico nella manutenzione e nella pulizia, adatto ad ambienti interni ed esterni, pubblici o privati, tutto ciò lo qualifica come una soluzione valida per ogni tuo progetto.
